## CENTRAL PENNSYLVANIA CHAPTER CONSTRUCTION SPECIFICATIONS INSTITUTE

### Central Pennsylvania Chapter – Construction Specifications Institute

Dinner Meeting Notice

Tuesday, April 11, 2017

Participants will receive general knowledge of air barriers as they're used in commercial building construction. Participants' newly-gained knowledge of the subject matter will be assessed with two or three questions at the conclusion of each leaning objective, for a total of 12 questions. At the conclusion of the presentation, course attendees will be able to:

Describe an air barrier and its functional requirements.

Recognize benefits provided by air barriers.

Understand building code requirements for air barriers.

Identify materials commonly installed as air barriers.

This program will be registered with the AIA Continuing Education System for 1 LU.

Our dinner meeting will be held at the  
RADISSON HOTEL, 1150 Camp Hill Bypass, Camp Hill,  
PA

## President's Message

Chapter Members,

Things are looking up this spring, even though the Exhibitors' Show was canceled due to snow. Our chapter's great show team has been able to reschedule the event with the Radisson Hotel for May 3rd. I hope you can all attend and enjoy the event.

Our meeting on April 11th will be a joint event with the American Society of Professional Estimators of Central PA. Chris Atwood is arranging for a program on air barriers. See the program description in CHOICE.

I want to remind everyone about the 2017 Middle Atlantic Region Conference in Pittsburgh, PA. The Pittsburgh Chapter has some great events lined up besides the usual continuing education programs. You can register at [www.eventbrite.com](http://www.eventbrite.com). If you call the Sheraton Hotel for reservations, be sure to use the code "MARC" when registering.

Robert Loftin  
Central PA Chapter President

Design of Affordable and Efficient  
Ground Source Heat Pump Systems  
ASHRAE Instructor

**STEPHEN KAVANAUGH**  
PhD, Fellow ASHRAE

Steve Kavanaugh is professor emeritus of mechanical engineering at the University of Alabama-Tuscaloosa.

This short course describes the best design practices of ground source heat pump systems to achieve maximum customer benefit. The course examines the economic analysis of ground source vs. more traditional systems and what is necessary to design an effective and efficient ground source system. The course covers energy analysis, equipment selection, drilling technologies, testing requirements, hydronic system design and system controls. Participants will learn all that is necessary for the design and installation of a successful ground source heat pump system.

**\* Short Course starts at 8:00 a.m.**
